

Know what your space can keep, before you spend a shilling.

“Turning a backyard, a budget, and a question into a flock plan you can trust.”

PoultryFit Kenya is a mobile and web platform that helps **small-scale poultry keepers** decide what they can keep, feed it for less, catch problems early, and find **real help nearby** — for every type of poultry.

THE PROBLEM

Most small-scale poultry keepers in Kenya start with no structured way to know:

- How many birds their space and budget can actually support
- Whether their ward or county allows poultry keeping at all
- What to feed each age group at the lowest real local cost
- Whether a sick bird needs a vet, and where the nearest one is

As a result, many lose money to overcrowding, wrong feed, and disease they could have caught earlier.

WHY IT MATTERS

- ✓ Lowers the entry cost of starting a flock the right way
- ✓ Cuts avoidable losses from overcrowding and disease
- ✓ Connects keepers to real vets and agrovets nearby
- ✓ Keeps feed costs honest using real, local prices
- ✓ Supports every poultry type, not chickens alone

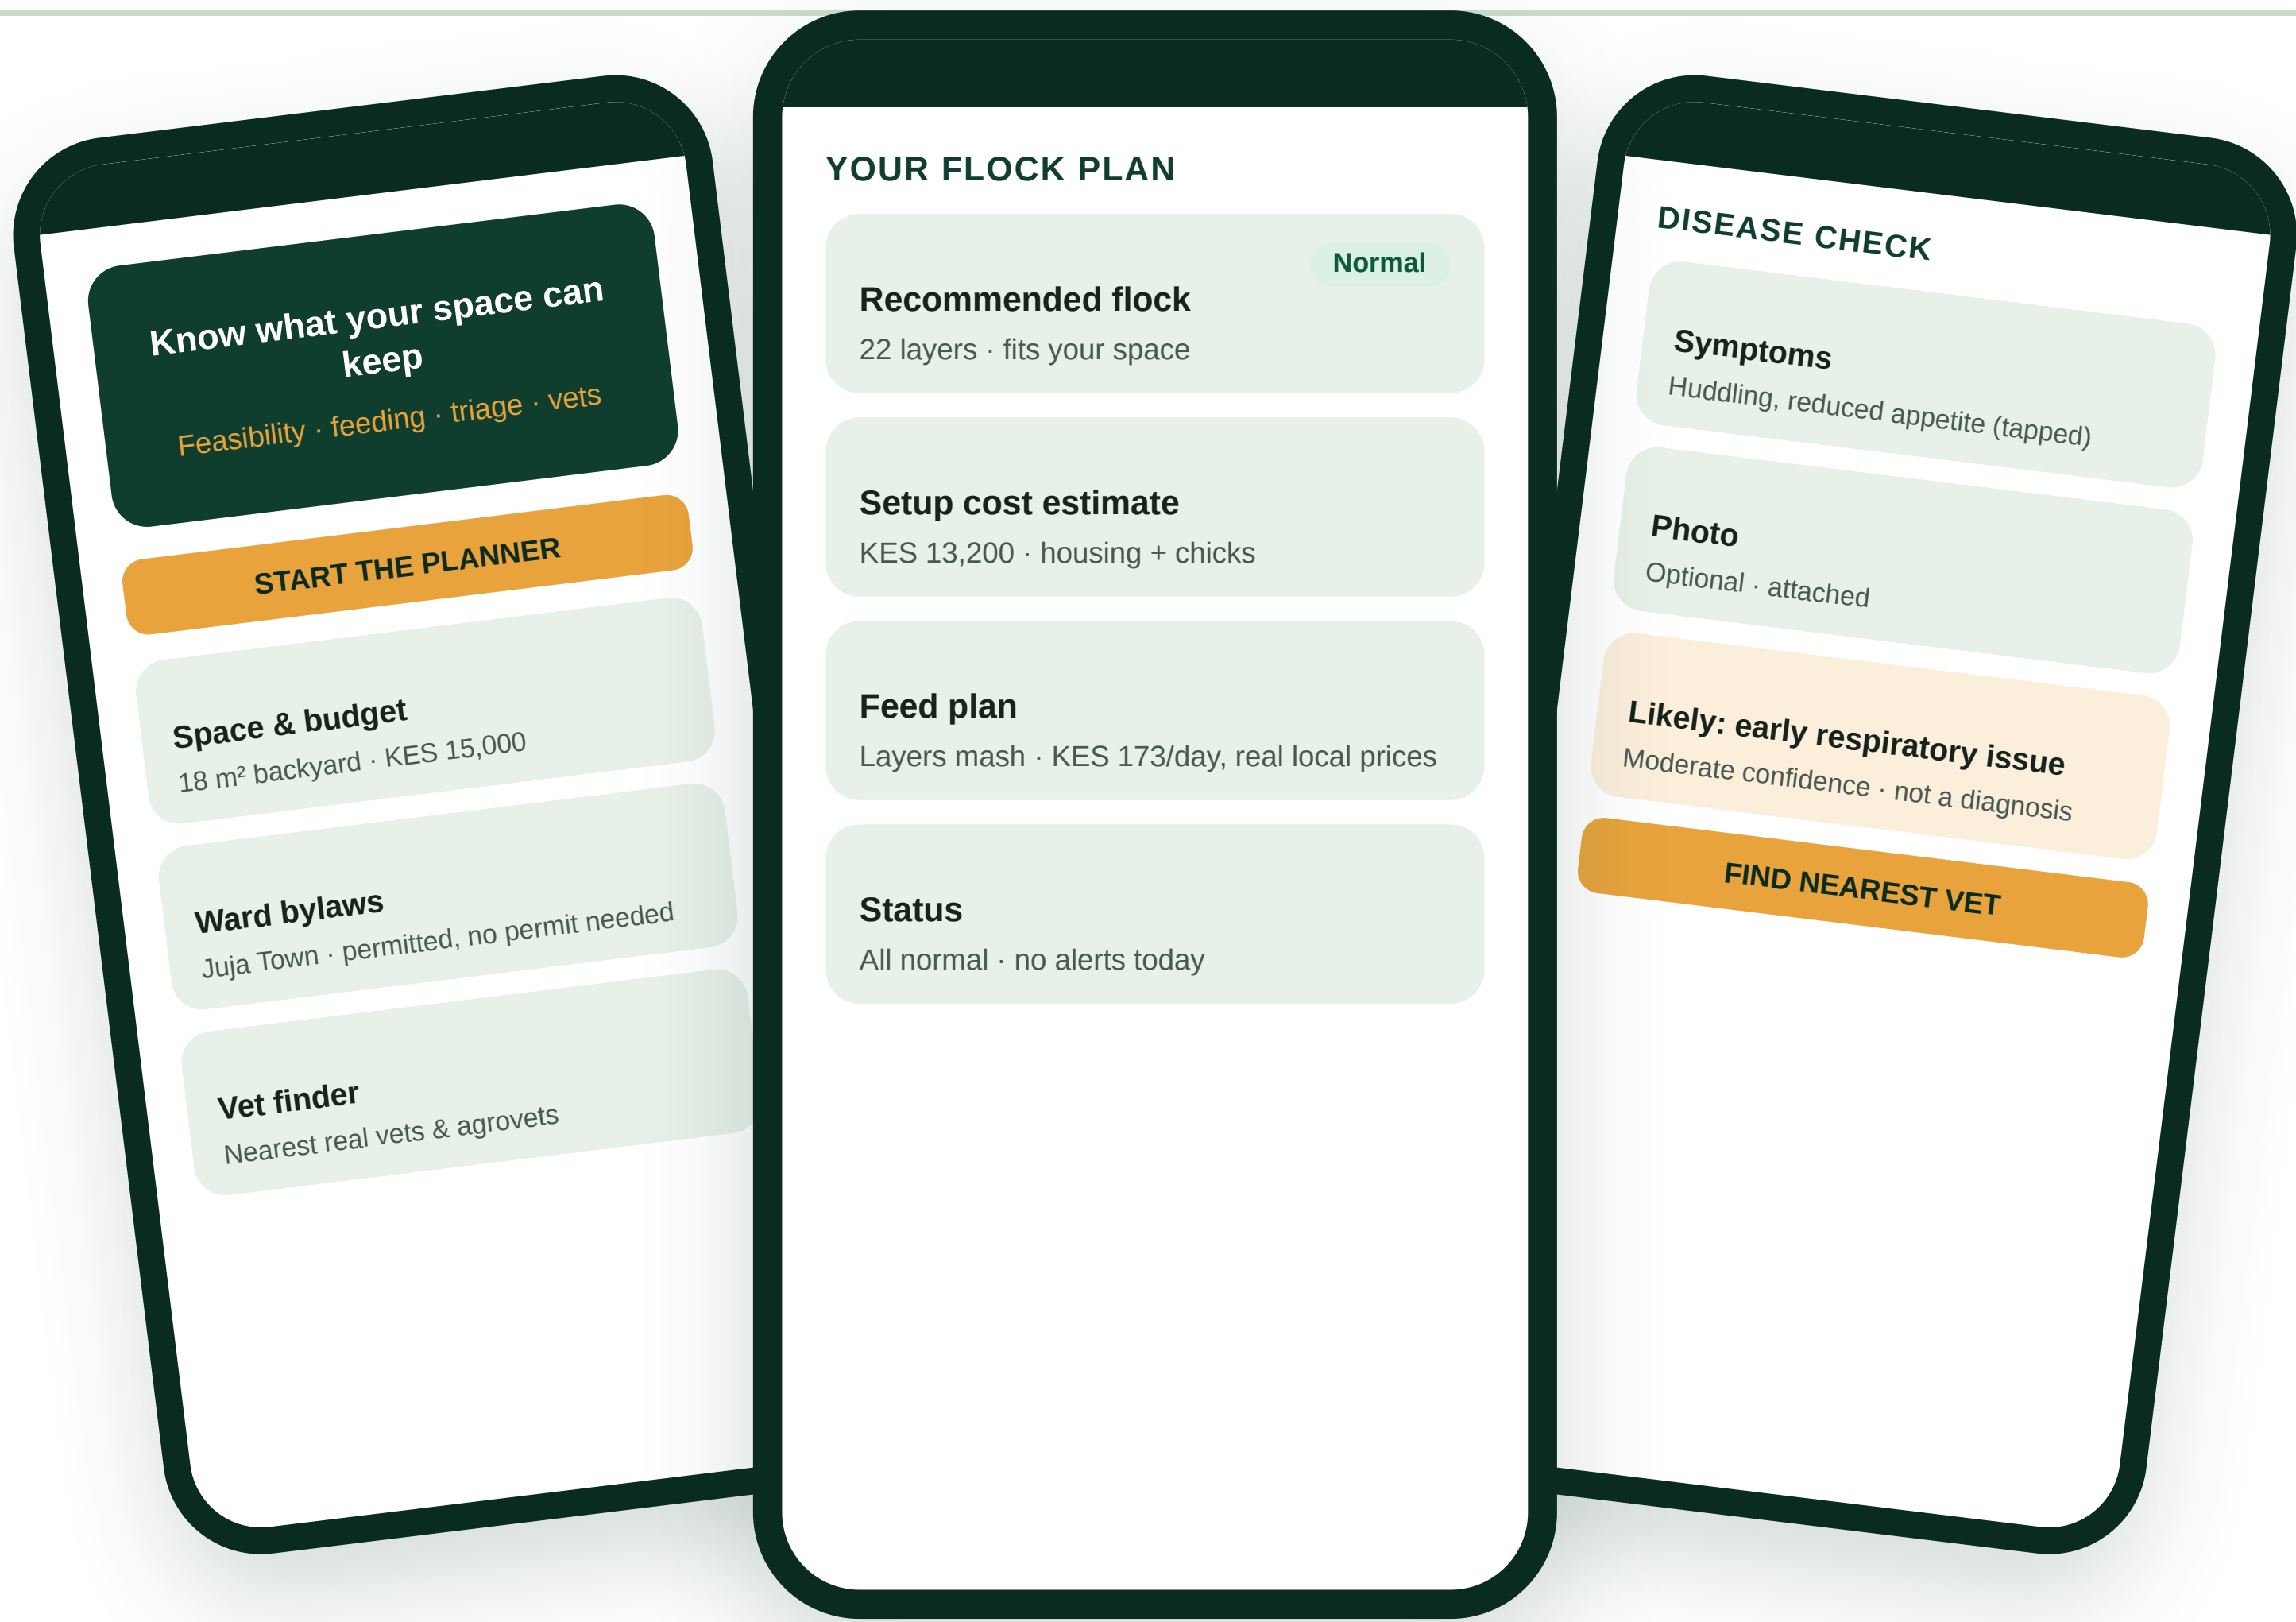

OUR SOLUTION

PoultryFit Kenya plans a flock before it exists, then helps it get off to a healthy start.

NEW FARMERS CAN

- Get a flock size recommendation from space + budget
- See their ward's bylaws before spending anything
- Get a feed plan costed against real local prices
- Check a sick bird and find a vet in two taps

HOW IT WORKS

Tell Us Your Start
Tell us your space & budget

Get Your Plan
Flock size, bylaws, and a costed feed plan

Start Keeping
Follow the plan with confidence

Act Early
Triage issues fast, reach a vet nearby

TARGET AUDIENCE

First-Time Urban Keepers

- Anyone deciding whether to start a flock
- Backyard, rooftop, or balcony space
- Layers, broilers, kienyeji, ducks, quail, turkey

Vets & Agrovets

- Listed and discoverable by nearby keepers
- Receive triage-routed enquiries, not guesswork
- Prices and stock visible to real local demand
